FOR HIM

HOW CAN I EARN MONEY FROM GOOGLE KEYWORD RANKING?

If you are new to blogging or digital marketing it might be hard to understand how the top online earning websites make money, this page may help enlighten you

I have been working on the net for many years, but like most people new to the industry I made mistakes. However, everything changed when I read an article about SEO for internet marketers. These marketers were getting their blog content and landing pages onto the first page in the search engines within a few days. I was fascinated and needed to know how the hell they were doing it.

After a month of browsing the internet I came across two systems that I am still using today. One was a training platform that I will discuss now and the other was a Wordpress plugin I will mention later. These platforms are where my journey began and how I have managed achieve a six figure income in just a few years. The training platform I am referring to is call Google Sniper also know as Gsniper or GS.

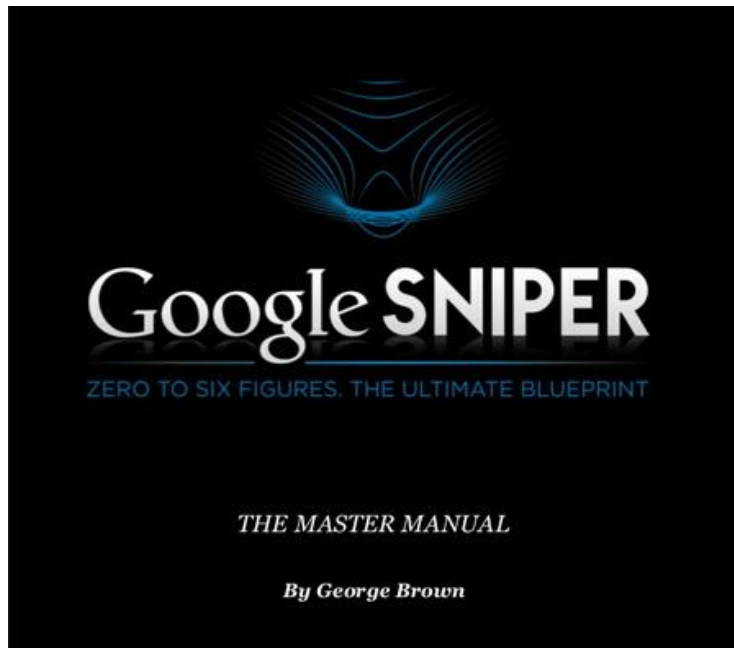

Affiliate marketing and Google Sniper

Is it possible to make money on the internet using Google Sniper?

It is easy to be skeptical and I defiantly was a non-believer. GS wanted me to believe that they could get my sites onto the first page. For me it was a hard sale, but at the time I was struggling with my internet business and needed a real solution fast.

I hated the idea of paying to access information, but information is power and the ones who had it were not given it away. So, I sucked it up and decided to pay. In retrospect it was the best money I have ever spend and over the years I have modified and developed the system to fit my own needs.

Who is George Brown?

George is a internet marketing millionaire who has made his money from creating a web based training platform

He has created a system that brings targeted traffic to your sites. In the past, having large amounts of traffic was king, but now we have realized that targeted traffic is far more effective.

Google Sniper takes you through the process via PDF material and video training. Its goal is to show you how to get lucrative targeted traffic to your pages. To get a sneak preview click on the video link below.

Targeted traffic is key to success

What does Google sniper teach us about keyword ranking?

Targeted traffic is key to success in this online method. Without the right type of people viewing your blog content your business is going nowhere. So, having the right audience will increase your sales. However, if you are a network marketer it will also increase the amount of enrollments as well as sales.

That is what GS will do for your business. It will help you target the right audience. Then convert that traffic into prospects and customers. If you are reading this page you may already have a product you are trying to market. If this is not the case I was suggest a product that is:

- High quality
- At the higher price range
- A disposable product that the costumer needs every month
- A desirable product that the customer gets passionate about
- A product that can be sold digitally
- A company that you the marketer can do from any country in the world
- A company that you can trust

On the link below I have added my personal recommendation of one of the most reliable and honest company online.

What if I have no product or business to market, how can I earn money from Google Sniper?

doTERRA is a great place to start because it is a trusted company

There are many options available via the internet, but a good benchmark is to start with something you are passionate about. It will come out in your writing if you truly believe in what you are selling.

So, be passionate!

A network marketing company worth considering is doTERRA

doTERRA was formed in 2008 and offers a range of products ranging from therapeutic grade essential oils to doTERRA oil infused toothpaste and supplements. They are sold on a philosophy of natural living by doTERRA distributor that speaks very loudly to millions of people around the world.

doTERRA start up fee is very low and high percentage of the distributor are enjoying a passive income from simply sharing the oils online via social media, blogging and landing pages as well as in persons.

Click on the link below to find out more about one of the safest most trusted companies in the world. Their product line is probably one of the best selling products that people really want to buy.

What other choices do I have to earn money online?

Clickbank or Digistore24 are both interesting and lucrative alternative

A great place to start is Clickbank or Digistore24. They are some of the best marketplaces on the web for selling digital and physical products. It acts as a conduit for product owners and affiliate marketers who want to promote digital products on the web. Clickbank and Digistore24 have a massive selection of products starting from wellness programs, money making systems and even gardening tips. Whatever your niche Clickbank and Digistore24 will have it.

TRUSTED BUSINESS

Finding trusted online money making sites

I have reviewed many affiliate programs and network marketing businesses and asked myself, "Do I trust these companies?" It is a big concern and something that should be taken into account when choosing a product or business.

Strangely enough the network marketing industry are easier to review, because there is so much information available. A few good information sites are Top 100 MLM companies and the Better Business Bureau that gives great impartial reviews.

How the top earning websites make money?

However, the affiliate companies are often one man bands posing as larger concerns. It is because many of the affiliate companies start their lives as an individual building a digital marketing business in his / her bedroom. This doesn't mean they are dishonest, but it does mean that the buyer should beware of their fragile nature.

The benchmark should be that if they have a good looking webpage that the business has invested a lot of time and money into, it is likely a legitimate business. However, if you are using the Google Sniper platform it will give you the knowledge to understand what is the good, the bad and the ugly affiliate programs.

There are so many great affiliate products available to promote that it is not possible to fail in the long term. Long term meaning that you will make a great income on a daily bases. Gsniper gives you the skills and knowledge to create and design landing pages that will give the customer a felling of trust and reassurance in your affiliate product. Anyone who has every purchased anything on Amazon will tell you that a professional design creates trust in the product. This will directly reflect on the amount of products that are sold and how much you earn from your sites.

They are one of the same. Great keywords are nothing without placing them in the best possible places in your content. Splashing words here and there has the opposite effect by over-optimizing your content hence down ranking your landing page or blog.

Of course, many internet marketers like to use pay-per-click advertising to gain traffic, but I personally prefer the organic methods. My main preference for organic traffic is because its free and its passive in its marketing method. I know there is no guarantee you will gain any sales, but PPC does not guarantee sales either, but you still need to pay for the service.

Organic traffic and Gsniper

This is where the magic happens. I can remember when I first started using the Google Sniper methods and how surprised I was that it worked. I had been blogging for a while, trying all the bad tricks, while spamming the hell out of everything. Finally, I had to reassess the situation, because it just didn't work.

So, what does work?

Most internet marketing professionals will agree that the main concept to rank your landing page or blog is on and off page optimization and keyword research.

But, what does that mean?

The Gsniper method explains that any keyword will not do. You need the right keywords to help your page rank. The main concept is that the right keyword is one with the highest search ratio and lowest competition. This in theory will get you into the top positions in most search engine results.

A marketing friend of mine had tried this method without subscribing to Gsniper and failed badly. What they did not fully understand was that the concept in itself is too wide. Gsniper teaches you how to find the right words beyond the basic concept. In other words we are looking for the golden egg among keywords.

Does Google keyword ranking help with SEO?

Great keywords are nothing without placing them in the best possible places in your content

The on page optimization method

Once you have found the golden egg the next stage is placing it in the right place in your content. This is where I cheat a bit, because I found that over-optimizing is as bad as under-optimizing when ranking content.

The original theory was to add keywords in the title, subtitle, links, images and various places around your content. This is still somewhat valid but to get every bit of juice out of your SEO, Google sniper gives you the best solution for ranking high.

To make your life even more simple I have been using another tool in parallel with Gsniper almost since the started called [SEOPressor](#).

SEOPRESSOR IS A MUST HAVE TOOL

WHY USE SEOPRESSOR IF GOOGLE SNIPER IS ALREADY OFFER A PREFECT SYSTEM?

I have been working with the rules of basic SEO for some years, using GS. However, SEOPressor uses all these concepts, theories and dissects them for your Wordpress blog. SEOPressor gives a detailed overview allowing you to twitch your text given you amazing results.

SEOPressor is one of the most effective SEO tools on the market because it will tell you if you have put the keywords in the right place or not. Also, it will tell you what type of format such as H1, H2 or H3 the keywords titles should be and how much influence the images will be to the ranking of the blog, webpage or article.

If you have made a mistake or error by over-optimizing your content this system will help find a solution. If you really want the SEO advantage, this system will give you the absolute top rank position in the major Internet service providers. At the same time SEOPressor continuously monitors your sites reminding you exactly where you need to optimize and what is running smoothly in order to bring up the rank of your website and blog.

WHAT WILL WE LEARN FROM THE GOOGLE SNIPER TRAINING PLATFORM?

I personally believe that for the information you are getting, it is worth a lot more

Great training material

This training platform offers a massive amount of educational material in PDF and video explaining step by step how to rank your website or blog. This is a tried and tested method of optimizing your web based projects founded in 2009 with regular updates until its latest manifestation - Sniper 3.0. The main concept of Gsniper is to help and support the marketers to build sniper sites that will rank on the first page of the internet service providers. The web based algorithm changes all the time, so this system is updated and developed to be consistent with all the web directory's.

New material

Gsniper is offering new and interesting educational material all the time such as the Bulletproof manual, Monthly webinars, One on one support and Process mapping. The key to success online is to keep up to date with all new developments online.

How to make money on Gsniper?

This is an interesting question, because GS will allow you to develop and create multiple income streams outside of Gsniper. Once I had started implementing the ideas shared on this platform and creating my niche content everything changed. All of my sites started to rank higher and receiving more traffic. Even my network marketing business went through the roof. I could not believe it.

My expectations were very low. I was hoping to make a few hundred dollars a month. How wrong I could be.

This platform shared with me all the tricks and ideas to put my products in front of the people who wanted to buy them. This system is so passive that I hardly feel that I am doing anything.

The fact is that at the start it is a lot of work, but once your sites are up and running you don't need to update them for sometimes years. Most of my niche pages are still on the first page on all the search engines. This means finally I can run my business on auto-pilot and make a passive income 24 / 7.

Why is it important that you have your website on the first page?

When we search for something in search engines we get 10 results on the first page. A keyword is used to define the subject, topic or information we are looking for. Each result will be determined on the site speed, backlinks, the words used in the content and various other factors.

So, what does that all mean?

It simply means that if you can get your landing page, blog or social media page in the top ten you are in the best part of the city. This will be the greatest opportunity to advance your internet business into overdrive.

Once you have succeeded to get your webpage in one of the top ten places, the next goal is to stay there. So, beyond SEO, is your content interesting and informative? This will influence the longevity of your website and how long it stays in the top 10.

However, the main importance is that, if your webpage is number one in a search you will get 42% of the traffic. However, if you are second you will only get 11% and third 8%. This is a large difference, which means that everything you can do to improve your position is vital for online success.

Success meaning, more views, more leads, more prospects, more sales and finally more money in your pocket.

How do I know my webpage has ranked?

BY STEVEN JACKSON

After I have built my site and shared it with the world how will I know my pages rank?

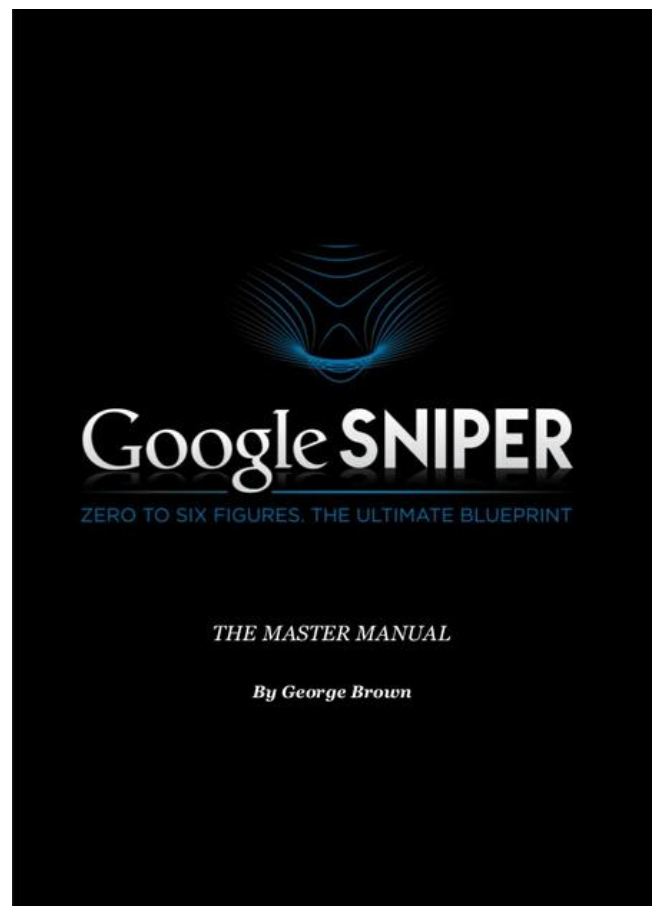

You can use a free rank checker to check if your efforts have come to fruition. There are many available, but at the moment I am using a very simple site called, Check PageRank.

Google PageRank is one of the methods used to determine a page's relevance or importance. Important pages receive a higher PageRank and are more likely to appear at the top of the search results. A PageRank is measured from 0 - 10.

How much does Google Sniper cost?

At the moment, this training platform is available for only 47\$. I personally believe that for the information you are getting a lot for your money. I think it is worth a lot more, but I am only the reviewer not the owner. There is also a 60 day money back guarantee which is a protection for the buyers who may not really understand what they are purchasing.

THE GOOGLE SNIPER AND SEO CONCLUSION

CONCLUSION

I PERSONALLY BELIEVE THAT FOR THE INFORMATION YOU ARE GETTING, IT IS WORTH A LOT MORE

I can recall in my early days in network marketing. After subscribing to Gsniper I went from recruiting a few people once in a while to recruiting personally 10-20 people a month. My sales went through the roof and then suddenly my enroller called me asking what I was doing. Of course, it had to be something dodgy because he could do it. I gave him a brief explanation of what Google Sniper was all about and he gave me an acknowledgement of my success. Even now I don't believe he really understood or believe that's what I was doing really worked. He couldn't understand that by simply creating a niche element to my business changed everything.

My final word on what sniper offered me. I was the opportunity to take control of the lead generating system by creating a niche. Sniper help me see that there was many different niches out there that would generate leads for me prime business. Every new niche create a new stream of income to my business and the end game called success.

If you are serious about being successful online then Google Sniper will give you the edge on the competition. I know it works because I have been using their methods for a long time with no regrets. It is a matter of faith, but I am glad I just said to myself, "What have I got to loose?"

If you want to learn how can I earn money from Google keyword ranking click on the source link below add your name, email address and a short message on the form available and I will get back to you asap....
